

GO term

negative regulation of viral genome replication
response to interferon- α
translation
response to virus
aerobic respiration
defense response to symbiont
purine-containing compound biosynthetic process
small molecule metabolic process
regulation of steroid biosynthetic process
smooth muscle cell-matrix adhesion
negative regulation of leukocyte migration
protein polymerization
regulation of cellular process
negative regulation of neuron differentiation
bone remodeling
establishment of cell polarity
cytoskeleton organization
regulation of GTPase activity
meiotic cell cycle
establishment of chromosome localization
microtubule cytoskeleton organization
nuclear division
cell division
chromosome segregation
