time_vs0_lung_neg_iMO1_day−28vs0_bubble.pdf
defense response to virus
defense response
killing of cells of another organism
biological process involved in interspecies interaction between organisms
regulation of viral life cycle
immune response
response to external stimulus
type I interferon production
cytolysis in another organism
adenylate cyclase−modulating G protein−coupled receptor signaling pathway
cellular response to type II interferon
osteoblast differentiation
positive regulation of monoatomic ion transmembrane transport
positive regulation of fat cell differentiation
RNA processing
regulation of fibroblast growth factor receptor signaling pathway
osteoclast maturation
dentinogenesis
epithelial cell differentiation
negative regulation of neuron apoptotic process
sensory perception
embryonic morphogenesis
cell−cell junction organization
lipid homeostasis
secondary alcohol metabolic process
steroid metabolic process
behavior
ribonucleoprotein complex biogenesis
cytoplasmic translation
