tissue_28_neg_resDC2_tissue−lungvsmln_bubble.pdf
response to lipopolysaccharide
response to external stimulus
interleukin−2 production
regulation of body fluid levels
humoral immune response
adult behavior
response to lipid
lymphocyte migration
negative regulation of defense response
biological process involved in interspecies interaction between organisms
leukocyte homeostasis
tissue development
nervous system process
regulation of multicellular organismal process
leukocyte cell−cell adhesion
negative regulation of protein modification process
response to endogenous stimulus
programmed cell death
DNA repair
chromosome localization
DNA replication
chromosome organization
cell division
chromosome segregation
microtubule cytoskeleton organization involved in mitosis
