time_vs0_blood_neg_pMO_day−28vs0_bubble.pdf
negative regulation of response to biotic stimulus
defense response to virus
regulation of viral life cycle
cell killing
antigen processing and presentation
cellular response to interferon−beta
peptide antigen assembly with MHC protein complex
positive regulation of defense response
cytolysis in another organism
interleukin−1 beta production
positive regulation of leukocyte activation
positive regulation of T cell activation
regulation of lymphocyte proliferation
positive regulation of response to external stimulus
mononuclear cell differentiation
regulation of canonical NF−kappaB signal transduction
regulation of molecular function
regulation of multicellular organismal process
cell communication
