tissue_15_neg_AM_tissue−bloodvslung_bubble.pdf
response to lipopolysaccharide
regulation of homotypic cell−cell adhesion
myoblast fusion
endomembrane system organization
protein metabolic process
tissue regeneration
regulation of signaling receptor activity
negative regulation of macrophage derived foam cell differentiation
regulation of smooth muscle cell proliferation
Wnt signaling pathway
positive regulation of chemokine production
purine−containing compound metabolic process
mRNA metabolic process
nucleobase−containing compound catabolic process
organelle organization
reproductive process
lipid metabolic process
memory
regulation of cellular localization
carbohydrate metabolic process
small molecule metabolic process
epithelium development
cellular process
carbohydrate derivative metabolic process
lipid storage
regulation of biological quality
cell migration
behavior
growth
response to endogenous stimulus
response to light stimulus
regulation of cell migration
response to wounding
system development
glucose homeostasis
gliogenesis
cellular response to chemical stimulus
cellular response to lipoprotein particle stimulus
